"Cloning of a novel crystal protein gene crylk from Bacillus
"Cloning of a novel crystal protein gene crylk from Bacillus
"Lintingiensis subsp. morrison!";

FEMS Microbiol. Lett. 134.159-164 (1959).

-!- FUNCTION: PROMOTES COLLOIDOSMOTIC LYSIS BY BINDING TO THE MIDGUT
BPITHELIAL CELLS OF INSECTS. SELECTIVELY TOXIC TO ARTOGEIA RAPAE
AND NOT ACTIVE ON PLUTELLA XYLOSTELLA.

-!- DEVELOPMENTAL STAGE: The crystal protein is produced during
sporulation and is accumulated both as an inclusion and as part of

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            bacillus
